Approval of Minutes

1. Action: The minutes of the last meeting, 7 February 1952, (IAC-M-59) were approved subject to the following comments:

a. The FBI pointed out that what could be done by the FBI would depend upon future arrangements which had not yet been worked out in respect of proposed trips by Soviet officials (ref. para. 2). (Mr. Armstrong said that it was his understanding that discussions between the Department and FBI were now taking place. He also mentioned that the Department plans to deliver on Saturday to the Soviet Embassy the note regarding regulation of travel with release to the Press on Monday and that the Department attached importance to the maintenance of the "Secret" classification of this document until that time. He reported that investigation showed that there were no TASS representatives in New York except those accredited to the U.N.)

b. With reference to the intelligence coordinator for Austria (paragraphs 11 and 12) Mr. Armstrong noted that while he had concurred in General Smith's proposal that [redacted]

Austria, he assumed that it is understood that this was dependent on the acquiescence and concurrence of Ambassador Donnelly. He noted that the Ambassador would be in Washington around the 1st of March and that this could be discussed with him at that time.

Probable Soviet Courses of Action with Respect to Germany During 1952. (NIE-53)

2. Action: Approved as amended.

3. Discussion: With respect to the possibility of Soviet withdrawal from Eastern Germany as pointed out by the Air Force, General Bolling called attention to recent evidence which casts considerable doubt on such a possibility in 1952. He referred to the recent increase of 80,000 Russian troops in East Germany bringing the total to 354,000, the expansion of the East German alert police from 52,000 to 120,000 and the change in title of such units from "battalion" to "regiment." The experience of Soviet withdrawal in Korea and the possibility of similar withdrawal in East Germany, however, was believed by A-2 to warrant notice in a footnote.

Intelligence Value of the
Maintenance of U. S. Missions
in Poland, Czechoslovakia,
Hungary and Rumania. (IAC-D-41)

4. Action: Agreed that an Ad Hoc group should prepare for IAC consideration at the next meeting a draft memorandum to the Secretary of State on this question.

5. Discussion: Mr. Armstrong indicated that while this subject had been given careful attention in recent months in the Department, the immediate concern as evidenced by this letter related to the growing feeling of the U. S. public and individuals in Congress that something needs to be done about the treatment being accorded our missions in Satellite countries. There is also considerable doubt in the eyes of some of the public and senators of the value of continuing to maintain these missions. Mention was made of the desirability of getting the view of the Psychological Strategy Board on this question but it was left that the State Department would approach the Board directly for its view.
